Table of contents (update fields to populate)

1. Overview

The AX-4 sensor module outputs a conditioned analog signal on pin 7. Table 1 lists the recommended operating envelope.

2. Specifications

Table 1 — Recommended operating conditions

Parameter	Min	Typ	Max	Unit
Supply voltage	3.0	3.3	3.6	V
Ambient temperature	-40	25	85	°C
Output swing	0.1	—	2.9	V

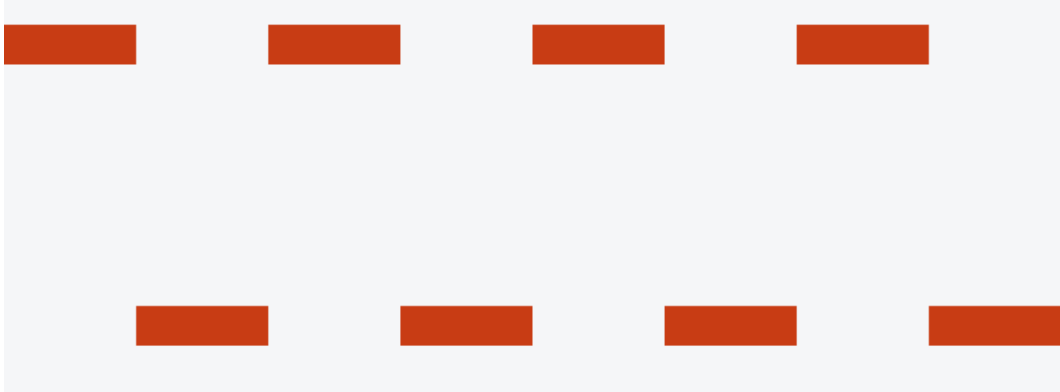

Figure 1 — Output waveform, 50 Hz square drive

3. Transfer function

$V_{out} = 1.25 * (1 + R_f/R_g) * V_{in}$
